

YUVARAJAN S

Lead Data Analyst

+91 729923704 | Chennai, India | syuvarajan3@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 6+ years of experience in banking and healthcare analytics. Expertise in SQL, Python, Azure/AWS, and BI tools (Power BI, Tableau). Proven track record of building ETL pipelines and interactive dashboards to drive risk compliance and business insights. Spearheaded data governance projects at BNP Paribas, improving efficiency by 30%. Currently seeking a mid-senior data role to leverage analytics skills for strategic decision-making.

SKILLS

- **Programming:** SQL, Python (Pandas, NumPy, ETL, automation), basic NoSQL
- **Data Engineering:** End-to-end ETL pipeline development, data ingestion, transformation, and workflow automation
- **Cloud & Big Data:** Azure (Databricks, Data Lake, Data Factory), AWS (S3), Hadoop, PySpark, Open Data
- **Databases:** PostgreSQL, Relational Data Modeling, data warehousing (star/snowflake schemas)
- **BI & Visualization:** Power BI (DAX, Power Query), Tableau, advanced Excel (VBA, dashboards, automation)
- **Tools & Platforms:** Dataiku DSS, ServiceNow (GRC/ITSM), JIRA, Jenkins, SharePoint
- **Data Governance & Quality:** Data validation, data quality checks, RBAC, compliance and risk reporting
- **Analytics & Automation:** KPI/MIS reporting, operational analytics, Python automation, web scraping, process optimization
- **Methodologies:** Agile & Scrum practices, stakeholder collaboration, requirement gathering, and end-to-end data lifecycle management.

EXPERIENCE

Lead Data Analyst - BNP Paribas

Sep 2023 - Present

- **ETL & Data Pipeline Development:** Led data management using Dataiku DSS and Azure Databricks for cleaning, transformation, and preparation. Designed and automated ETL workflows using Dataiku DSS, SQL, and Python, optimizing data transformation and data cleaning, improving efficiency by 30%.
- **Data Governance & Risk Analysis:** Developed cybersecurity Risk dashboards in Tableau & Power BI for real-time monitoring and Data separated for individual Entity scope. Implemented data governance strategies and risk analysis models in ServiceNow GRC IT, ensuring regulatory compliance and secure access control.
- **Data Integration & Advanced Analytics:** Built and optimized data pipelines with Python, SQL, and PostgreSQL (pgAdmin 4, Azure, Databricks) for seamless data flow. Integrated ServiceNow data with Dataiku DSS, enabling AI-driven analytics. Developed ETL queries to extract, transform, and load data efficiently.
- **Implemented Data Access Control for Cross-Functional Teams:** Developed and implemented a data segregation logic to ensure entity-based and data-level restrictions, allowing cross-functional teams and users to access only their relevant data in the dashboard.
- **Business Intelligence & Data Visualization:** Created interactive dashboards in Tableau & Power BI for senior management. Developed custom Power Query solutions for risk & compliance insights.
- **ServiceNow Data Analytics & ITSM Reporting:** Analyzed ITSM data (Incident, Change, Risk, Compliance) for IT operations improvements. Automated ServiceNow data extraction & reporting enhancing decision-making for every Quarterly activity.
- **Framework Development:** Designed reusable data governance and ETL frameworks, standardizing workflows for scalability. Built custom automation templates to accelerate onboarding of new datasets, ensuring consistency, compliance, and reduced development time.

Data Analyst - Thryve Digital Health LLP

Feb 2022 - Sep 2023

- **Data Analysis & ETL:** Performed end-to-end ETL pipeline development, leveraging SQL and Python for data extraction, transformation, and loading. Leveraging Python (Pandas) and Advanced Excel functions, I effectively cleaned and processed complex datasets, ensuring accuracy and consistency. I identified patterns, trends, and key insights to provide actionable recommendations for clients, ultimately driving business improvements.
- **Visualization & Reporting:** I created and presented comprehensive reports, dashboards, and visualizations using Power BI, Python, Seaborn, and Matplotlib. These visualizations helped stakeholders easily interpret key performance metrics (KPIs) and trends, leading to informed decision-making. My work was focused on simplifying complex data into clear, actionable insights, whether for internal teams or client presentations.
- **Process Automation:** To increase efficiency, I used Python and VBA to automate repetitive tasks, saving the client a total of 33 hours per week. By automating data extraction, transformation, and reporting processes, Automated data workflows using Excel Macros and R scripts, reducing manual reporting effort by 20 hours weekly. Additionally, I developed automated solutions for business KPIs, reducing 10 hours per week of manual reporting efforts.
- **Agile Methodology:** Working within Agile and Scrum frameworks, I collaborated closely with cross-functional teams to prioritize tasks and deliver iterative results.

Data Analyst - Arcadia

Jul 2019 - Dec 2021

- **ETL & Data Pipeline Optimization:** Developed ETL processes in SQL and Python, improving data ingestion and transformation workflows across multiple sources (FTP, AWS S3).
- **Dashboard Development & KPI Monitoring:** Created Power BI and Tableau dashboards for MIS reports and KPI tracking, monitoring customer utility data trends for 2M+ accounts.
- **Process Improvement & Cost Reduction:** Automated Jenkins job executions for Python scripts, reducing manual intervention by 25% and improving system efficiency.
- **Process Automation:** Automated routine reporting tasks using R and Excel, streamlining operations. Developed predictive models based on historical data to optimize resource allocation, forecast customer demand, and mitigate risks.

PROJECTS

Automation of RAS Data Collection & Reporting - BNP Paribas

Jun 2024 - Present

- Led the automation of manual data entry for 26 Entities related to central indicators (1,2,5,6,7,8,12,13,16), reducing human intervention and improving efficiency. Designed and implemented an Excel-to-ServiceNow integration to automate data entry and processing. Streamlined the RAS Campaign process by automating data collection from multiple entities, replacing manual entry in GRC IT with an automated pipeline.
- Successfully automated 13 out of 16 RAS (Risk Appetite Statement) metrics, targeted full automation by September 2025, aligning with ECB recommendations.
- Developed an Open Data Platform for data collection and RAS calculation, ensuring seamless integration with GRC IT for metric validation. Enabled advanced data analysis and visualization in Tableau, transforming raw data into actionable insights for reporting.

Tools Used: Tableau, Dataiku DSS, ServiceNow, SQL, ETL, Python, Data Governance, Opendate, Azure Data Factory, Databricks

Data Separation & IT Risk Automation - BNP Paribas

Jan 2024 - May 2024

- Implemented data segregation models ensuring role-based visibility and secure entity access for IT risk profiles.
- Automated data integration between OPEN DATA (BNPP datalake), ServiceNow GRC IT, and DATAIKU DSS, optimizing data enrichment, grouping, and calculations. Designed automated Tableau dashboards for real-time IT risk profiling.
- Designed automated Tableau dashboards for real-time IT risk analysis and compliance monitoring.
- Developed a centralized schema (GRC IT OPEN DATA) to store all GRC IT-related tables, restricting access to authorized users.
- Published enriched datasets to Tableau Server, enabling real-time dashboarding and entity-specific visibility.

Tools Used: Tableau, Dataiku DSS, ServiceNow, SQL, ETL, Python, Data Governance, Databricks, Azure

Highmark Health Solution (USA) - Thryve Digital health

Mar 2022 - Aug 2023

- Achieved an 86% increase in data availability using Excel, Python, and Power BI. Resolved data integrity issues including deduplication, schema validation, and transformation, ensuring 99% data accuracy in dashboards.

Tools Used: AVAYA, JIRA, Power BI, Excel, SQL, Python, AWS S3, SharePoint

Charter Communication(Spectrum) - Urjanet

Dec 2019 - Oct 2021

- Managed 3+ clients through two major corporate mergers. Managed 2M customer Accounts in 45 days SLA with over 450+ Utility providers.

Tools Used: FTP, Jenkins, Excel, R, SQL, Python, AWS S3, Power BI

CASE Management - Urjanet

Feb 2020 - Jan 2021

- Built strategies and implemented domain knowledge within the team, ensuring effective training and performance improvement.

Tools Used: FTP, Jenkins, Excel, R, SQL, Python, AWS S3, Power BI

AUTOMATIONS

- Automated real-time Outlook email tracking into centralized Excel dashboards, improving operational monitoring and reporting efficiency.
- Developed VBA macros to integrate AVAYA data with Excel, enabling live data extraction, transformation, and reporting.
- Engineered Python-based ETL pipelines to process multiple live data sources, ensuring real-time data availability and accuracy.
- Automated Jenkins job workflows using Python, enhancing pipeline efficiency and reducing manual intervention.
- Built Python automation for email handling and web scraping, extracting customer portal data for analytics and reporting.
- Delivered automated KPI/MIS reporting solutions using Excel and VBA, enabling data-driven decision-making for stakeholders.
- Implemented data validation and quality checks across automated pipelines, ensuring data accuracy, consistency, and compliance with governance standards.

EDUCATION

Master of Science, Information Technology

Aug 2019 - Oct 2021

University of Madras (Distance Education), Chennai

CGPA - 7.8/10

Bachelor of Science, Computer Science

Jul 2016 - May 2019

Ramakrishna Mission Vivekananda College, Chennai

CGPA - 7.3/10
